GB Basis rack

Important:

- Read these instructions before the rack
- Only fit the rack as described in these instructions
- Keep these instructions in the car

Please note:

The permissible roof load, or for rear racks, the permissible nose or load weight, must not be exceeded. (See the owner's manual for details of the roof load). (See the model plate for details of the nose weight and load weight).

The roof load is made up of the weight of the basic rack and the weight of the attachment rack and payload.

The nose weight/Load weight is made up of the weight of the rear rack and the payload. After driving a short distance and at regular intervals thereafter, check the racks and the load to ensure that they are secure.

Side wind sensitivity, cornering and braking:

When carrying loads (on the roof or rear), the car will handle differently. For safety reason we recommend that you do not drive at speeds exceeding 120 kph or the relevant national speed limits.

Weight of the rack:

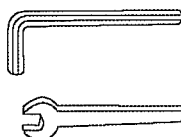

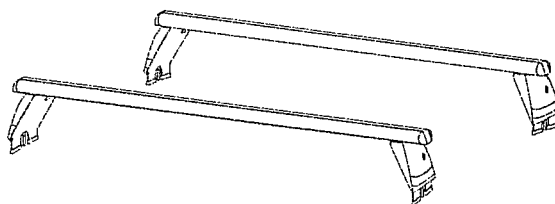

5,0 kg

Please note:

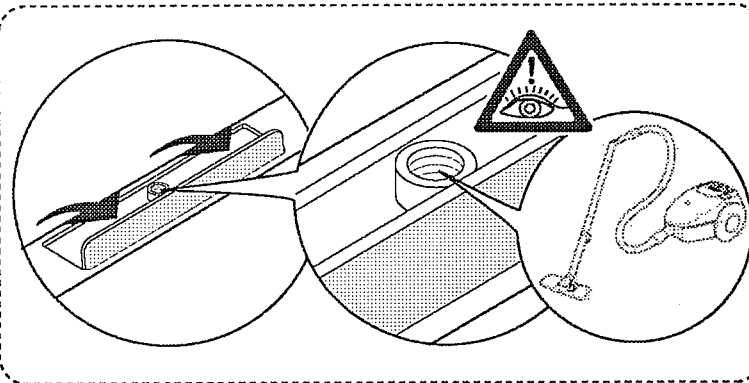

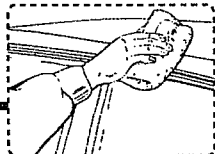

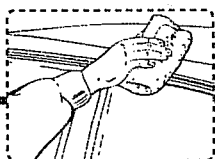

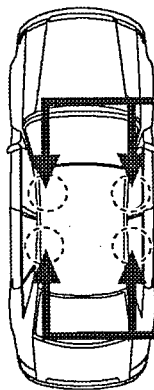

For the safety of other road users and to reduce fuel consumption, the racks should be removed when they are not in user.
