WARNING!

Hazard warning:

Incorrect installation or repair of Webasto heating systems may cause a fire or result in the emission of carbon monoxide, which can be fatal. Serious or fatal injuries can be caused as a result.

Specialist company training, technical documentation, specialized tools and equipment are required to install and repair Webasto heating and cooling systems.

NEVER attempt to install or repair Webasto heating or cooling systems if you have not successfully completed the company training and thereby acquired the required technical skills, or if you do not have access to the required technical documentation, tools and equipment needed to carry out correct installation and repairs.

ALWAYS follow all Webasto installation and repair instructions and observe all warnings.

Webasto does not accept any liability for defects and damage that are attributable to installation by untrained staff.

Validity

Manufacturer	Model	Type	EG-BE No./ABE
Opel	Antara	L-A	e4 * 2001 / 116 * 0118

Engine type	Engine model	Output in kW	Displacement in cm ³
10HM	Gasoline	167	3195

Vehicle and engine types, equipment variants and national specifications not listed in these installation instructions have not been tested. However, installation according to these installation instructions may be possible.

The installation location of a digital timer and summer/winter switch should be confirmed with the end customer before installation.

Heater Unit/Installation Kit

Quantity	Description	Order No.:
1	Opel-specific heater unit delivery scope	See Opel price list
1	Installation kit for Opel Antara (basic kit)	1311919A
1	Additional kit for Opel Antara 3.2 liter Gasoline	1311922A

Optional heater control:

Quantity	Description	Order No.:
1	Heater control	See Opel price list

Also required with automatic air-conditioning:

Quantity	Description	Order No.:
1	Kit for Opel Antara with Automatic Air-Conditioning	1311923A

Heater unit recommended for the respective vehicle class:

Vehicle	Heater unit
Compact car	Thermo Top E
Mid-size car, station wagon	Thermo Top C
Full-size car, van, offroader	Thermo Top P

The selection of the heater unit is based on the passenger compartment size of the vehicle and the level of comfort required by the customer!

**Foreword**

These installation instructions apply to Opel Antara vehicles with a 3.2 Gasoline engine and a manual transmission

- for validity, see page 2 - from model year 2007 and later, assuming technical modifications to the vehicle do not affect installation, any liability claims excluded. Depending on the vehicle version and equipment, modifications may be necessary during installation with respect to these installation instructions.

However, the stipulations in the "installation instructions" and "operating and maintenance instructions" for the *Thermo Top C/P/E* must always be observed.

The corresponding rules of technology and any information from the vehicle manufacturer should be observed during the installation work.

General Instructions

Installation should be carried out according to the general, standard rules of technology. Unless specified otherwise, fasten hoses, lines and wiring harnesses to original vehicle lines and wiring harnesses using cable ties.

Sharp edges should be fitted with edge protectors (split-open plastic hose).

Spray unfinished body areas, e.g. drilled holes, with anti-corrosion wax (Tectyl 100K, Order No. 111329).

Special Tools

- Torque wrench for 2.0 - 10 Nm
- Hose clamping pliers
- Metric Thread-Setter Kit

Explanatory Notes on Document

To provide you with a quick overview of the individual working steps, you will find an identification mark on the outside top right corner of the page in question.

Mechanical system

Electrical system

Coolant connection

Fuel connection

Exhaust system

Combustion air

Special features are highlighted using the following symbols:

Specific risk of injury or fatal accidents.

Specific risk of damage to components.

Specific risk of fire or explosion.

Reference to general installation instructions of Webasto components or to the manufacturer's vehicle-specific documents.

Reference to a special technical feature.

The arrow in the vehicle icon indicates the position on the vehicle and the viewing angle.

Preliminary Work**WARNING!**

- Disconnect the battery "earth" or "ground" connection.
- Depressurize the cooling system.
- Copy the factory number from the original type label to the duplicate type label.
- Remove years that do not apply from the duplicate label.
- Attach the duplicate label (type label) in the appropriate place.
- Completely remove the battery
- Remove the fuse and relay box
- Remove the engine cover
- Remove the engine control unit
- Disconnect the power-steering fluid reservoir
- Disconnect the expansion tank
- Remove the charge-air tube between the air filter and the turbocharger
- Disconnect the air hose from the charge-air tube to the engine at the engine
- Remove the filler neck of the window washer system
- Remove the vent line at the top to the coolant expansion tank
- Open the fuel tank cap, ventilate the tank.
- Close the tank cap again.
- Remove the underride protection
- Open the left tank mounting service lid
- Remove the A/C control panel according to the manufacturer's instructions (only with manual air-conditioning)
- Remove the glove compartment (only with automatic air-conditioning)

Remove page 29 "Operating Instructions for End Customer" and add to the vehicle operating instructions.

Installing receiver

- 1 Antenna

Installing antenna

- 1 Pushbutton

Installing push button

Preparing heater unit

b = 240 mm
c = 335 mm

Discard section X

Cutting coolant hoses to length

Remove water pump **2** from heater unit. Hose section **1** and spring clip will be reused. Discard retaining clip **3** and bolt.

Removing water pump

Replace 193° lid **1**.

Replacing pump lid

E-jot screw **2** [3x], tightening torque 10 Nm!

1 Bracket part 1

Preassembling bracket 1 on heater unit

- 1 M6x12 bolt, angle bracket, M6 flanged nut
- 2 Water pump
- 3 Rubber-coated pipe clamp, 48 mm dia.
- 4 M6x20 bolt, M6 flanged nut

**Preassem-
bling water
pump**

Eject screw **1** [3x], tightening torque 10 Nm!
Connect adapter line of water pump **2**, cut to
length and connect identical colors to wiring
harness of water pump using connectors
(crimp and shrink).

- 3 Existing spring clip [2x]
- 4 Existing hose section

**Preassem-
bling
heater unit**

Preparing installation location

- 1 Cross member for battery carrier
- 2 Drill out thread to 10 mm dia. [2x]

Drilling out
thread

Remove bracket **3** of hydraulic line **5** and mount as shown (depending on equipment). Original vehicle bolt **1** will be reused

- 2 Perforated bracket
- 3 M6x16 bolt, M6 flanged nut

Reposi-
tioning
hydraulic
line

Remove original vehicle hose **1**. Spring clip **2** will be reused.

Removing
hose

Shorten original vehicle hose **1** by 25 mm. Dispose of hose section **2**.

Separating
hose

- 1 Original vehicle hose
- 2 Original vehicle spring clip

**Re-mounting
hose**

- Completely remove control unit 1 with bracket
- 2. Discard bracket 2.

**Removing
control
unit**

- 1 Self-tapping Torx screw [2x]
- 2 Additional bracket
- 3 Control unit

**Preassem-
bling
control
unit**

- 1 M6x20 bolt, spring lockwasher [2x each]
on existing threaded holes
- 2 Additional bracket with control unit

**Installing
control
unit**

Installing heater unit

- 1 Loosely mount M8x30 bolt [2x]
- 2 Preassembled heater unit

Installing heater unit

Remove original vehicle screw 1 and discard.

Removing screw

- 1 Bracket part 2
- 2 M6 flanged nut [3x]
- 3 M8x40 bolt, spring lockwasher, large diameter washer

Installing bracket

Ensure sufficient spacing to neighboring components, especially to A/C line 1; correct if necessary.

Aligning heater unit

Coolant connection

WARNING!

Tighten all hose clamps to $2.0 + 0.5$ Nm.

Any coolant running off should be collected using an appropriate container!

Install hoses so that they are kink-free. Unless specified otherwise, always fasten using cable ties.

Position hose clamps and spring band clamps so that no other hose can be damaged.

The connection should be "inline" based on the following diagram:

Coolant routing diagram

All spring clips  = 27 mm dia.! All connecting pipes  = \varnothing 18x20.

All hose clamps  = 20-27 mm dia.! 1 = hose section between circulating pump and heater unit.

A = 18 mm dia. 180° molded hose.

Disconnect hose to engine outlet/heat exchanger inlet **2** at connection piece of engine outlet. Discard spring clip **1**.

Cutting point

When installing the coolant hose, ensure sufficient spacing to the vehicle gear shift mechanism.

**Con-
nection to
heater unit
inlet**

Hose **A** = 180° elbow provided.

1 Connection piece for engine outlet

**Con-
nection to
engine
outlet**

1 Edge protection

**Con-
nection to
heater unit
outlet**

Before connecting, fill the coolant hoses with coolant.

1 Hose section of heat exchanger inlet

Con-
nection to
heat
exchanger
inlet

1 Spacer bracket

Installing
spacer
bracket

Fuel Connection

CAUTION!

Open the vehicle's fuel tank cap, ventilate the tank and then re-close the tank lock.

Catch any fuel running off with an appropriate container.

Install fuel line and metering-pump wiring harness so that they are protected against stone impact. Unless specified otherwise, always fasten using cable ties.

Mount the fuel line and wiring harness with rub protection on sharp edges.

WARNING!

The fuel line and wiring harness are routed to the metering pump in as shown in the wiring harness routing diagram.

- 1 Included hose section as scuff guard [2x]
- 2 Mecanyl fuel line
- 3 Hose section, 10 mm dia. hose clamp [2x]

Con-
nection on
heater unit

- 1 Mecanyl fuel pipe and metering pump cable harness

Installing
lines

Ensure proper installation position of metering pump **3**, see "Installation Instructions".
Installation location in front of vehicle fuel tank!

- 1 5 mm shim
- 2 Angle bracket
- 4 Rubber-coated pipe clamp
- 5 Silent block, flanged nut [2x]
- 6 Original vehicle nut

Installation
location of
metering
pump

Connect fuel line **2** from heater unit to pressure side of metering pump [side with connector].

- 1** Wiring harness of metering pump, connector mounted
- 3** Hose section, 10 mm dia. hose clamps [2x].

Installing metering pump

- 1** Separate 90° molded hose at marking
- 2** Discard section

Preparing fuel standpipe

Cut closure off existing removal connection piece and push on short end of 90° molded hose **3**.

- 1** Fuel line
- 2** 10 mm dia. hose clamp [2x]
- 4** Fuel sender
- 5** Cable tie

Removing fuel

Fuel line **2** from fuel standpipe on intake side of metering pump [side without connector]. Check the position of the components; adjust if necessary. Check that they have free clearance.

- 1** 180° molded hose, 10 mm dia. hose clamp [2x]

Con- nection to metering pump

**Combustion air**

- 1 Combustion air pipe
- 2 Hose clamp

**Installing com-
bustion air
pipe**

- 1 Combustion air pipe
- 2 48 mm dia. p-clamp; rubber coating removed
- 3 Combustion-air intake muffler
- 4 Existing hole, M6 rivet nut, M6x20 bolt, spring lock washer

**Installing
muffler**

Exhaust system

- 1 Exhaust pipe
a = 460 mm
- 2 Exhaust end section
b = 230 mm

Discard section X

Preparing
exhaust
pipe

Shape exhaust pipe 1.

- 2 Red (rt) rubber isolator

Preparing
exhaust
pipe

Remove clip 2 from original vehicle wiring harness 1.

Dis-
connecting
original
vehicle
wiring
harness

- 1 Drill 9.1 mm dia. hole; install rivet nut

Installing
rivet nut

Bend perforated bracket upward by approx. 75° at bending line.

Bending perforated bracket

Check the position of the components; adjust if necessary. Check that they have free clearance.

- 1 Perforated bracket
- 2 Exhaust muffler
- 3 M6x20 bolt, flanged nut
- 4 M6x20 screw, spring lockwasher on rivet nut

Installing exhaust muffler

- 1 Hose clamp
- 2 Position red (rt) rubber isolator
- 3 Exhaust pipe

Installing exhaust pipe

- 1 Exhaust pipe
- 2 Hose clamp

Installing exhaust pipe

Ensure sufficient spacing to neighboring components (wiring harness to exhaust system).

- 1 Cable tie
- 2 Exhaust end section
- 3 Hose clamp
- 4 Original vehicle wiring harness

Installing exhaust end section

- 1 Red (rt) rubber isolator
- 2 Red (rt) rubber isolator with groove

Pushing on rubber isolator

- 1 Underide protection
- 2 42 mm dia. hole

Cutting out underide protection

Align red (rt) rubber isolator 2 with groove flush on exhaust end section 3 and on underide protection 1.

Mounting rubber isolator

Final Work

WARNING!

Reassemble the disassembled components in reverse order.

Check all hoses, hose, spring and Caillau clamps, as well as all electrical connections for firm seating.

Secure all loose cables using cable ties.

Only use manufacturer-approved coolant.

Spray the heater unit components with anti-corrosion wax (Tectyl 100K, Order No. 111329).

1 M8x30 bolt, spring lockwasher, flanged nut
[2x each]

Installing
battery
carrier

- Connect the battery
- Bleed and fill the coolant circuit according to the vehicle manufacturer's specifications.
- Set the digital timer.
- Set the manual air conditioning or automatic air conditioning according to the "operating instructions for the end customer".
- Check the proper operation of the additional heater, see the operating instructions/installation instructions.
- Attach the "Switch off additional heater before refueling" sticker to the left-hand B-pillar.

Operating Instructions for End Customer

Please remove page and add to the vehicle operating instructions.

Note:

We recommend matching the heating time to the driving time.

Heating time = driving time

Example:

For a driving time of approx. 20 min. (in one direction), we recommend not exceeding a switch-on time of 20 min.

If the summer/winter switch option has been installed, this must be switched in accordance with the time of year. The heater unit will then only switch on the vehicle fan to ventilate the vehicle interior in the position Winter  heat and in the position Summer .

Before parking the vehicle, make the following settings:

- 1 Set temperature to "max."
- 2 Set fan to level "1", or possibly "2"
- 3 Direct air outlet toward windshield

Manual air
con-
ditioning

- 1 Set temperature to "max."
- 2 Air outlet to windshield

Automatic
air-con-
ditioning
